from May 2006 NH-Alt and October 2006 NECAP Statewide Assessments

Content: District Mathematics

Sorted by: Name

The data provided on these ranking lists are based on the performance index scores that are calculated during Adequate Yearly Progress (AYP) reporting. Rankings are assigned by content area. Beginning this year, when a previous index score is available, a separate ranking is also calculated based on the improvement in the index score from one year to the next year. Districts that have the same index score (or the same improvement in index score) earn the same rank. High schools will not receive an index score until 2007-2008 AYP reports are issued in the spring of 2008, therefore high schools are not included in these ranking lists.

[†] Number of students who contributed to the index score.

[‡] There is some variation associated with all measurement, including test scores. For example, the results of public opinion polls are reported with a margin of error, such as 54 percent plus or minus (+/-) five percent. On these ranking lists the reported variation is the standard error of the mean (SE). Please note that as the number of students increases, the SE decreases.

* The SE is less than 0.1.

“A” A ranking is not assigned when fewer than eleven (11) student scores are included in the index score for a school or district.

“B” A ranking is not assigned for index score improvement if fewer than eleven (11) student scores were included in either the current or prior year index score.

The data provided on these ranking lists are based on the performance index scores that are calculated during Adequate Yearly Progress (AYP) reporting. Rankings are assigned by content area. Beginning this year, when a previous index score is available, a separate ranking is also calculated based on the improvement in the index score from one year to the next year. Districts that have the same index score (or the same improvement in index score) earn the same rank. High schools will not receive an index score until 2007-2008 AYP reports are issued in the spring of 2008, therefore high schools are not included in these ranking lists.

[‡] There is some variation associated with all measurement, including test scores. For example, the results of public opinion polls are reported with a margin of error, such as 54 percent plus or minus (+/-) five percent. On these ranking lists the reported variation is the standard error of the mean (SE). Please note that as the number of students increases, the SE decreases.

* The SE is less than 0.1.

“A” A ranking is not assigned when fewer than eleven (11) student scores are included in the index score for a school or district.

“B” A ranking is not assigned for index score improvement if fewer than eleven (11) student scores were included in either the current or prior year index score.

[†] Number of students who contributed to the index score.

[‡] There is some variation associated with all measurement, including test scores. For example, the results of public opinion polls are reported with a margin of error, such as 54 percent plus or minus (+/-) five percent. On these ranking lists the reported variation is the standard error of the mean (SE). Please note that as the number of students increases, the SE decreases.

* The SE is less than 0.1.

“A” A ranking is not assigned when fewer than eleven (11) student scores are included in the index score for a school or district.

“B” A ranking is not assigned for index score improvement if fewer than eleven (11) student scores were included in either the current or prior year index score.

Sorted by: Index Score Ranking

The data provided on these ranking lists are based on the performance index scores that are calculated during Adequate Yearly Progress (AYP) reporting. Rankings are assigned by content area. Beginning this year, when a previous index score is available, a separate ranking is also calculated based on the improvement in the index score from one year to the next year. Districts that have the same index score (or the same improvement in index score) earn the same rank. High schools will not receive an index score until 2007-2008 AYP reports are issued in the spring of 2008, therefore high schools are not included in these ranking lists.

† Number of students who contributed to the index score.

‡ There is some variation associated with all measurement, including test scores. For example, the results of public opinion polls are reported with a margin of error, such as 54 percent plus or minus (+/-) five percent. On these ranking lists the reported variation is the standard error of the mean (SE). Please note that as the number of students increases, the SE decreases.

* The SE is less than 0.1.

“A” A ranking is not assigned when fewer than eleven (11) student scores are included in the index score for a school or district.

“B” A ranking is not assigned for index score improvement if fewer than eleven (11) student scores were included in either the current or prior year index score.

District Rankings Based on Index Scores from May 2006 NH-Alt and October 2006 NECAP Statewide Assessments Content: District Mathematics

Sorted by: Index Score Improvement Ranking

The data provided on these ranking lists are based on the performance index scores that are calculated during Adequate Yearly Progress (AYP) reporting. Rankings are assigned by content area. Beginning this year, when a previous index score is available, a separate ranking is also calculated based on the improvement in the index score from one year to the next year. Districts that have the same index score (or the same improvement in index score) earn the same rank. High schools will not receive an index score until 2007-2008 AYP reports are issued in the spring of 2008, therefore high schools are not included in these ranking lists.

[†] Number of students who contributed to the index score.

[‡] There is some variation associated with all measurement, including test scores. For example, the results of public opinion polls are reported with a margin of error, such as 54 percent plus or minus (+/-) five percent. On these ranking lists the reported variation is the standard error of the mean (SE). Please note that as the number of students increases, the SE decreases.

* The SE is less than 0.1.

"A" A ranking is not assigned when fewer than eleven (11) student scores are included in the index score for a school or district.

"B" A ranking is not assigned for index score improvement if fewer than eleven (11) student scores were included in either the current or prior year index score.

District Rankings Based on Index Scores from May 2006 NH-Alt and October 2006 NECAP Statewide Assessments Content: District Mathematics

Sorted by: Index Score Improvement Ranking

The data provided on these ranking lists are based on the performance index scores that are calculated during Adequate Yearly Progress (AYP) reporting. Rankings are assigned by content area. Beginning this year, when a previous index score is available, a separate ranking is also calculated based on the improvement in the index score from one year to the next year. Districts that have the same index score (or the same improvement in index score) earn the same rank. High schools will not receive an index score until 2007-2008 AYP reports are issued in the spring of 2008, therefore high schools are not included in these ranking lists.
